

## **Environmental Scientist: 2 - 5 years Experience**

### Job Summary

We are seeking a suitably qualified environmental scientist with 2 - 5 years proven experience in the areas of environmental management and licences.

The successful candidate will work on and lead projects relating to water, waste and wastewater in the areas of environmental management, resource efficiency, licence application, review and compliance.

### Roles / Responsibilities:

Responsibilities will include:

- Provision of consultancy advice to a broad spectrum of clients on issues relating to environmental legislation & regulation, resource efficiency, circular economy and general environmental management.
- Preparation of environmental licence and permit applications relating to waste and wastewater.
- Project management and technical lead for specific projects relative to demonstrated skill-sets and experience
- Compliance Management and Reporting relating to IPPC/IED, waste management and wastewater discharge
- Desk based research and feasibility studies relating to waste recovery, management and reuse.
- Representing ECOS and interacting with our clients, associates, environmental regulators and contacts both in terms of technical project work and business development.

### Education / Professional Qualifications:

- Environmental Scientist/Engineer.
- The successful applicant will be able to reference and demonstrate their track record in the area of environmental management and will have strong experience in the areas of waste management in particular.
- Additional specific studies and/or professional qualification relating to environmental management, licensing and compliance.
- In depth knowledge of legislation and regulatory issues affecting environmental performance.

Additional requirements:

- Candidates should be self starters who are able to demonstrate their ability to work both on their own initiative and within project teams. The successful applicant will demonstrate their potential leadership skills
- Applicants must be able to demonstrate their knowledge of waste and wastewater licensing processes, environmental management best practice and the EU legislation which governs them.
- We are seeking candidates who are reliable and can demonstrate a strong work ethic.
- The successful candidate will have excellent oral/ written communication skills and computer literacy.
- Applicants should demonstrate commercial awareness.
- The successful candidate will have an open and enquiring mind and be able to demonstrate their willingness to develop their knowledge and skillets on an ongoing basis.
- The successful candidate will thrive in a busy work environment and be able to demonstrate how they will structure projects and deliver goals within tight deadlines.
- Applicants should have their own transport and a Full Clean Driving Licence.
- Fluent spoken English is a requirement.

Location:

Based out of our Limerick office with project work at various other locations subject to client requirements.

Salary:

Salary is negotiable and will depend on the demonstrated skill levels and experience of candidates

Type:

Permanent Role subject to 6 month probationary period

Applicants should provide a cover letter and CV which demonstrates their suitability for the role to [hr@ecos.ie](mailto:hr@ecos.ie) before 7 December 2018 quoting reference E1227
